SUMMARY

I achieved a Bachelor's degree in Informatics Engineering with a strong passion for coding and AI development. Since my third semester, I worked as a teaching assistant, and by my fifth semester, I began working professionally while maintaining excellent academic performance. I've contributed to AI-integrated software projects across education, travel, and smart assistant platforms.

TECHNICAL SKILLS AND LANGUAGES

- **Technical Skills:**
 - **Advanced:** Next JS, Vue JS, React JS, Node JS, Express JS, Javascript, Typescript, Open AI, RAGFlow, Dify, Cursor, Windsurf, Tailwind, Bootstrap, HTML5, CSS3, Github, Gitlab.
 - **Basic:** Nest JS, Laravel, Java, Python, PHP.
- **Languages:**
 - **Advanced:** Indonesian, English.

JOB EXPERIENCE

PT Skyshi Digital Indonesia

Aug 2023 - Present

Junior Full-Stack Developer & AI Engineer

- Collaborated in cross-functional teams of 5–10 members, working closely with designers, product managers, and engineers to deliver scalable solutions.
- Developed both international projects (Japan, Singapore) and in-house products, gaining exposure to diverse business domains such as education, recruitment, and travel.
- Built platforms powered by AI, integrating technologies like RAGFlow, Dify, and OpenAI to enable intelligent features such as automated CV generation, AI-driven coding challenges, and document-aware chatbots.
- Contributed to end-to-end development: from frontend design with React.js, Next.js, Vue.js, Tailwind CSS to backend services with Node.js, Express.js, NestJS.
- Enhanced product functionality by implementing real-time code execution, chatbot-based customer service, and secure payment integrations.
- Gained first-hand industry experience in applying AI and prompt engineering to real-world projects, making Skyshi Digital Indonesia the foundation of my professional journey in modern AI technologies.
- Strengthened communication and collaboration skills through international client engagement and delivering solutions tailored to different cultural and organizational contexts.

University of Pasundan

May 2023 - Aug 2025

Lecturer Assistant

- Assisted in teaching Informatics Engineering students on algorithms, programming (Java), and machine learning (Python with Google Colab).
- Prepared and delivered tutorials, lab sessions, and assignments, ensuring students gained practical coding and AI experience.
- Mentored small groups of students, supporting their understanding of data structures, algorithms, and applied AI concepts.

PROJECT EXPERIENCE

Anarise Japan - Skyshi Digital Indonesia

Jun 2025 - Nov 2025

Frontend Developer and Prompt Engineer

- Built a coding challenge and job-hunting platform with React.js, Next.js, Vue.js, and Node.js.
- Trained AI models to auto-generate coding problems and assess solutions.
- Streamlined candidate evaluation with real-time code execution and ranking system.

Journal International

May 2025 - Aug 2025

Researcher at University of Pasundan and Changwon University

- Published a research article on AI in education, focusing on automated test generation aligned with national curricula.
- Lead author of: **Automation of Indonesian High School Mathematics Assessment Generation Using OpenAI GPT-4o.**
- Contributed to prompt engineering, model evaluation, and data-driven exam design.

Conference International - KIICE 2025

May 2025 - Aug 2025

Researcher at University of Pasundan and Changwon University

- Presented at the KIICE Conference (Korea Institute of Intelligent Computing and Engineering) on AI in education.
- Co-authored the paper: **Empowering Education with AI: Generating Indonesian High School Math Exams Using ChatGPT 4.0.**
- Collaborated across institutions on applied NLP and prompt engineering for educational assessment.

University of Pasundan

May 2025 - Aug 2025

Lecturer Assistant

- Teaching informatics engineering students about algorithms and programming using Java language.
- Teaching informatics engineering students about Machine Learning using Google colabs Python language.

SHIGYOcloud Japan - Skyshi Digital Indonesia

Jan 2025 - Jun 2025

Fullstack Developer and AI Engineer

- Built a document-aware AI chatbot using Next.js, NestJS, RAGFlow and TypeScript.
- Enabled multi-format file uploads (PDF, DOCX, TXT) as dynamic knowledge sources.
- Integrated real-time web search to enrich chatbot responses with external data.

Anarag Japan - Skyshi Digital Indonesia

Oct 2024 - Jan 2025

Frontend Developer and AI Engineer

- Built a document-aware AI chatbot using Next.js, RAGFlow and TypeScript.
- Enabled multi-format file uploads (PDF, DOCX, TXT) as dynamic knowledge sources.
- Integrated real-time web search to enrich chatbot responses with external data.

Alola Singapore - Skyshi Digital Indonesia

Jul 2024 - Jan 2025

Frontend Developer

- Developed a travel booking platform with chatbot-based customer service.
- Built responsive interfaces using Next.js and Tailwind CSS.
- Enhanced user experience with real-time interaction and seamless navigation.

Organization IOM ITB

Jun 2024 - Mei 2025

Fullstack Developer

- Built a donation platform for ITB alumni using Vue.js, Express.js, and Tailwind CSS.
- Designed responsive UI and streamlined donation workflows.
- Enabled secure transactions and admin dashboard for contribution tracking.

Gethired ID

Aug 2023 - Jun 2025

Frontend Developer

- Built a cv makers and job-hunting platform with React.js, Next.js, Vue.js, and Node.js.
- Integrate AI models to auto-generate CV.
- Implemented payment integration with Xendit.

Devcode - Skyshi Digital Indonesia

Aug 2023 - Jan 2025

Frontend Developer and Prompt Engineer

- Built a coding challenge and job-hunting platform with React.js, Next.js, Vue.js, and Node.js.
- Trained AI models to auto-generate coding problems and assess solutions.
- Streamlined candidate evaluation with real-time code execution and ranking system.

University of Pasundan

May 2023 - Aug 2025

Lecturer Assistant

- Teaching informatics engineering students about algorithms and programming.

EDUCATION

University of Pasundan - Bandung, Indonesia

Oct 2021 - May 2025

Bachelor of Engineering

- Majored in **Informatic Engineering**.
- GPA: **3.89** / 4.00.
- **Best Graduate of the University**
- Final Project Research: **Automation of Indonesian High School Mathematics Assessment Generation using OpenAI GPT-4o** — explored AI-driven test creation to streamline curriculum-based evaluation.

CERTIFICATION & CONTINUOUS LEARNING

- Best Graduate of the University - Class of 2025 (Batch 1)
- 1st Place, Creative & Innovative 2024 Business Plan - Categories Software Development
- Organizational Leadership Training at Universitas Pasundan

ORGANIZATION

Lingkung Seni Mahasiswa (LISMA) UNPAS

Oct 2021 - May 2025

Member

- I was actively involved as a member of the Choir and Music Unit and also took part as a committee member in organizing concert events.
