SUMMARY

I achieved a Bachelor's degree in Informatics Engineering with a strong passion for coding and AI development. Since my third semester, I worked as a teaching assistant, and by my fifth semester, I began working professionally while maintaining excellent academic performance. I've contributed to AI-integrated software projects across education, travel, and smart assistant platforms.

EXPERIENCE

Anarise Japan - Skyshi Digital Indonesia Frontend Developer and Prompt Engineer - Built a coding challenge and job-hunting platform with React.js, Next.js, Vue.js, and Node.js. - Trained AI models to auto-generate coding problems and assess solutions. - Streamlined candidate evaluation with real-time code execution and ranking system.	2025 Jun - 2025 Aug
Journal International Researcher at Pasundan University and Changwon University - Published a research article on AI in education, focusing on automated test generation aligned with national curricula. - Lead author of: Automation of Indonesian High School Mathematics Assessment Generation Using OpenAI GPT-4o. - Contributed to prompt engineering, model evaluation, and data-driven exam design.	2025 May - 2025 Aug
Conference International - KIICE 2025 Researcher at Pasundan University and Changwon University - Presented at the KIICE Conference (Korea Institute of Intelligent Computing and Engineering) on AI in education. - Co-authored the paper: Empowering Education with AI: Generating Indonesian High School Math Exams Using ChatGPT 4.0. - Collaborated across institutions on applied NLP and prompt engineering for educational assessment.	2025 May - 2025 Aug
Universitas Pasundan Lecturer Assistant - Teaching informatics engineering students about algorithms and programming using Java language. - Teaching informatics engineering students about Mechine Learning using Google colabs Python language.	2025 May - 2025 Aug
AI Reservation Japan - Skyshi Digital Indonesia Frontend Developer - Built a dashboard and user-facing page for restaurant call reservations. - Integrated AI-powered voice assistant for handling customer calls. - Developed using Next.js, TypeScript, and Tailwind CSS.	2025 Apr - 2025 Jun

SHIGYOcloud Japan - Skyshi Digital Indonesia Fullstack Developer and AI Engineer - Built a document-aware AI chatbot using Next.js, NestJS, RAGFlow and TypeScript. - Enabled multi-format file uploads (PDF, DOCX, TXT) as dynamic knowledge sources. - Integrated real-time web search to enrich chatbot responses with external data.	2025 Jan - 2025 Jun
Anarag Japan - Skyshi Digital Indonesia Frontend Developer and AI Engineer - Built a document-aware AI chatbot using Next.js, RAGFlow and TypeScript. - Enabled multi-format file uploads (PDF, DOCX, TXT) as dynamic knowledge sources. - Integrated real-time web search to enrich chatbot responses with external data.	2024 Oct - 2025 Jan
Alola Singapore - Skyshi Digital Indonesia Frontend Developer - Developed a travel booking platform with chatbot-based customer service. - Built responsive interfaces using Next.js and Tailwind CSS. - Enhanced user experience with real-time interaction and seamless navigation.	2024 Jul - 2025 Jan
Organization IOM ITB Fullstack Developer - Built a donation platform for ITB alumni using Vue.js, Express.js, and Tailwind CSS. - Designed responsive UI and streamlined donation workflows. - Enabled secure transactions and admin dashboard for contribution tracking.	2024 Jun - 2025 Mei
Devcode - Skyshi Digital Indonesia Frontend Developer and Prompt Engineer - Built a coding challenge and job-hunting platform with React.js, Next.js, Vue.js, and Node.js. - Trained AI models to auto-generate coding problems and assess solutions. - Streamlined candidate evaluation with real-time code execution and ranking system.	2023 Aug - 2025 Jan
Universitas Pasundan Lecturer Assistant Teaching informatics engineering students about algorithms and programming.	2023 May - 2023 Aug

EDUCATION

Bachelor of Engineering Pasundan University, Indonesia - Majored in Informatic Engineering. - GPA: 3.9 / 4.00 - Final Project Resarch: Automation of Indonesian High School Mathematics Assessment Generation using OpenAI GPT-4o — explored AI-driven test creation to streamline curriculum-based evaluation.	2021 Oct - 2025 May
--	---------------------

ADDITIONAL INFORMATION

Technical Skills: Open AI, RAGFlow, Dify, Cursor, Windsurf, Next JS, Vue JS, React JS, Tailwind, Bootstrap, Node JS, Nest JS, Express JS, Laravel, Typescript, Javascript, Java, Python, PHP, HTML5, CSS3, Github, Gitlab. Languages: Indonesian, English.
